AVENGER 140MP Winter Blowout

A high-quality, portable 140-amp multi-process welder

Linde is blowing out our inventory of PROSTAR® AVENGER™ 140MP multi-process welders. Take advantage of this special offer before the year ends.

About the AVENGER 140MP Welder

The ProStar AVENGER 140 MP is capable of MIG welding 3/16-inch steel in a single pass. This machine also provides for stick welding with electrodes up to 3/32-inch with the exceptionally smooth DC stick welding output. Stick weld on materials such as steel, stainless steel, cast iron, hard facing and aluminum.

Additionally, the AVENGER 140MP can perform DC gas tungsten arc (TIG) welding on steel and stainless steel materials with the optional TIG torch.

It uses leading edge inverter technology to provide high-quality welds that are crisp, clean and consistent with plenty of power that will impress the most experienced welders. Typical applications include construction, auto repair, farm and ranch and light industrial applications.

Included in box:

- 10 ft. ground cable
- 10 ft. electrode holder
- 10 ft. MIG gun
- 10 ft. gas hose
- Dual gauge inert gas regulator
- .023/.030 and .030/.035 drive rolls
- Spare contact tips
