

# Improve Dosing Consistency With Gases From Linde

Scalable gas delivery systems and equipment to grow with your business.

Microbulk gas delivery tanks range in sizes from small to large so you have the system right for your growing business.

## Your Preferred Choice for Dosing Applications

Linde is your preferred choice for liquid nitrogen dosing technology supported by liquid nitrogen microbulk gas delivery systems. Linde provides nitrogen dosing systems for pressurization, preservation, freezing and Modified Atmosphere Packing (MAP) applications. Our long history of serving customers like you together means you will have reliable support for troubleshooting or system planning.

## Linde Grows With You

Linde can provide the right system for your application needs with tanks ranging from 235 liters up to 7,000 liters, so even if your operation is just getting started, Linde has the right tank for your operation today and can grow with you as your business grows.

## Microbulk Gas Delivery System Benefits

Linde microbulk gas delivery systems provide the features you need, including real-time telemetry systems and automatic order generation, to help you focus on your business and not on managing product levels. Further, our microbulk supply systems help provide reliable product quality which helps you meet dosing needs and expectations with consistent results.

## Turnkey Dosing Solutions

You can rely on Linde's expertise when planning your nitrogen dosing operation. With over 100 years history in gases technologies in dozens of markets and applications, Linde is ready to help you plan and build a reliable, tailored gas delivery system that will empower your business to succeed.

## Applications

Pressurization	Preservation	MAP
→ Bottled water	→ Automobile oil	→ Baby formula
→ Packaged drinks	→ Beer and wine	→ Coffee
→ Oils	→ Cannabis	→ Nuts & trail mix
