

Site Gas Management Services: Your Best Choice.

The Right Choice for Gas Management

Medical gas logistics is manpower intensive and critically important in the provision of patient care. Site Gas Management Services from Linde Healthcare can help you manage your medical gas supply requirements to reduce your overall costs.

Linde can help you eliminate obsolete inventory, reduce your manpower requirements, improve cylinder handling safety and consolidate billings. Tailored to your facility, our program will give you regular report cards on the objectives being achieved.

Why Hospitals Are Turning to Linde for Medical Gas Management

Relying upon Linde's Site Gas Management Services means our on-site manager will be working inside your facility to help ensure your medical gases are where you need them, when you need them. Site gas management means Linde will manage cylinder and gas-related assets from the loading dock to virtually every point of use in your facility.

The Joint Commission performs unannounced inspections, including the assessment of medical gases by a Life Safety Code Specialist. Your Linde on-site manager will be able to provide up-to-date information if required.

Now you can free up your personnel and reduce costs associated with managing your medical gas inventory and delivery/pick-up to point of care by using Linde site Gas Management Services. One call to your local Linde Healthcare representative or to 1-877-772-9247 is all it takes get started.
