Nonstop Producer—CNC Control

The ProStar PRSAHKD Series is loaded for automation with an all-star lineup of power, benefits, and reliability.

It includes four controlled axes: Y1 and Y2 (depth stop), X (rear stop), and R (height stop). This machine delivers an excellent price/performance ratio. Contact your Praxair representative to learn more.

STANDARD EQUIPMENT

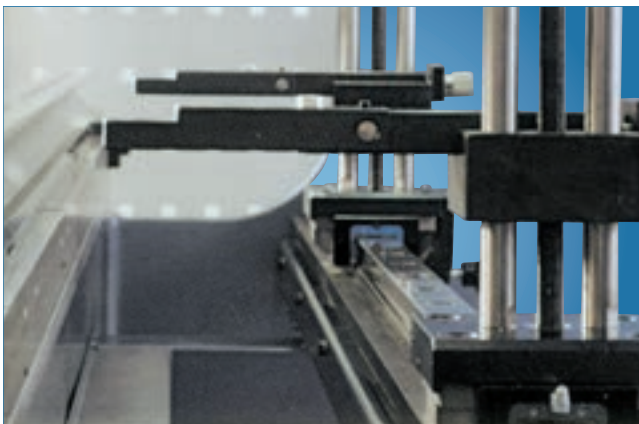

- DT 10 Touch CNC plus four controlled axes (Y1, Y2, X, R)
- Manual lower crowning
- Manual clamping fixture for male die with wedge crowning
- Standard male die and multi-V die
- Two support arms with T-slots

Available Options

Additional axes: Z1, Z2, X1, X2, R1, R2

Oil cooler, additional foot switch

Preparation/tandem operation

Laterally adjustable finger stops

Fiber optic safety management
